

SPRAGUE LINE HIGH PERFORMANCE TRANSIT

Improving public transit in the region's major corridors

PROJECT DESCRIPTION

Sprague Avenue is an important transit corridor in the region and is identified in STA's comprehensive plan as a future High Performance Transit (HPT) Line. As the City of Spokane makes improvements to revitalize the areas around East Sprague Avenue, STA is also making investments to improve transit connectivity and the customer experience in the corridor.

This project is being introduced in phases, with anticipated completion in 2023.

BUDGET & TIMELINE

Total Project Budget: \$6.5 million (phased in)
Estimated Completion: 2023

2017	Phase I: Helena to Napa Approximately \$150,000
2019	Phase II: Bernard to Scott Approximately \$500,000
2020-2023	Future phases

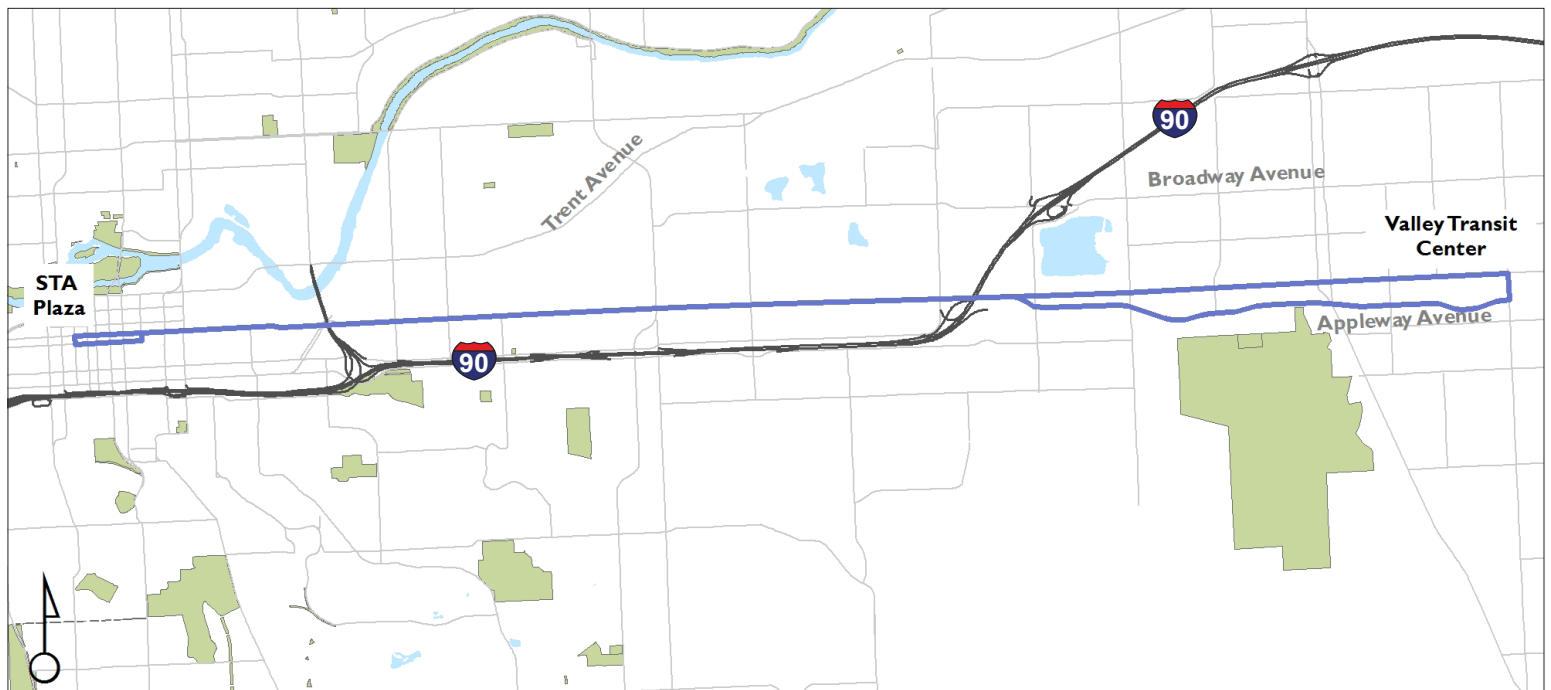

BENEFITS

The Sprague Line will provide:

- Improved station design for faster boarding
- Improved travel times for passengers
- Improved access for residents and employees in the corridor
- Support for Sprague Avenue redevelopment efforts
- Shelters at high ridership locations

Glass shelters maintain visibility of businesses while providing protection from the elements

The Sprague Line is anticipated to carry nearly a million passengers annually.
