

SPRAGUE LINE

Improving public transit in the region's major corridors

Project Description

Sprague Avenue is an important transit corridor in the region and is identified in the *STA Moving Forward* 10-year plan as a high performing transit line. As the City of Spokane makes improvements to revitalize the areas around East Sprague Avenue, STA is also making investments to improve transit connectivity and the customer experience in the corridor.

This project is being introduced in phases, with anticipated completion in 2024.

Glass shelters maintain visibility of businesses while providing protection from the elements

Benefits

The Sprague Line will provide:

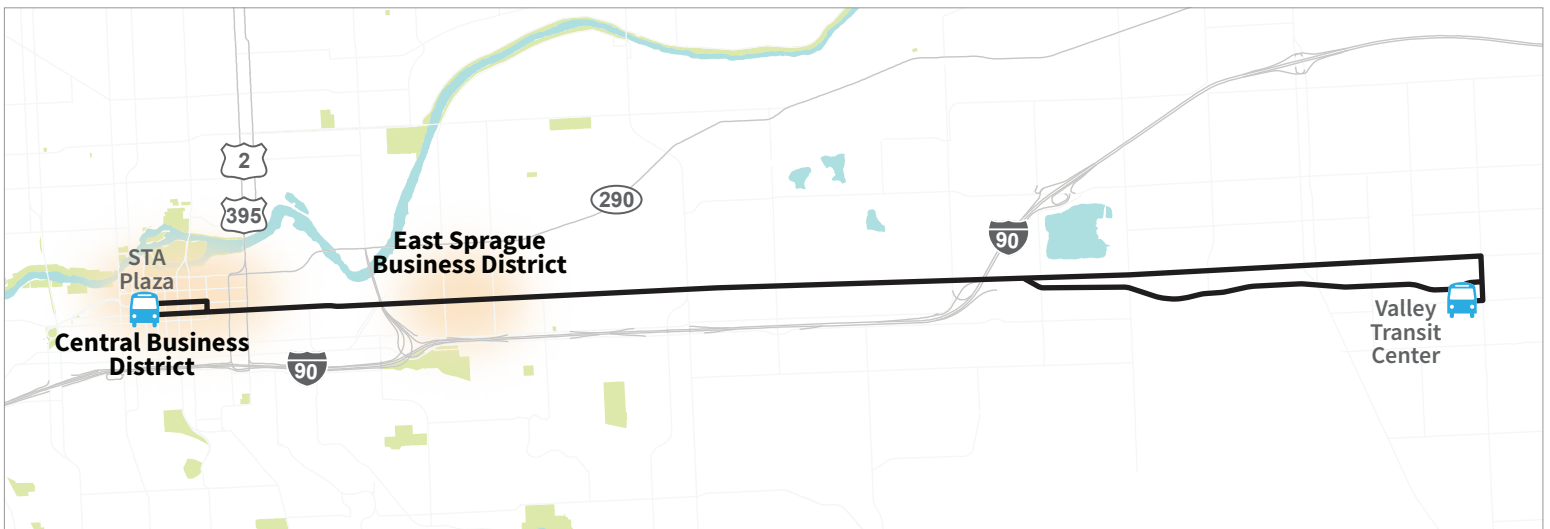

- Improved station design for faster boarding
- Improved travel times for passengers
- Improved access for residents and employees in the corridor
- Support for Sprague Avenue redevelopment efforts
- Shelters at high ridership locations

Budget & Timeline

Total Project Budget: **\$6.5 million** (phased in)

Estimated Completion: 2024

2017	Phase I Segment I: Helena to Napa Approximately \$200,000
2019-2021	Phase I Segment I: Division to Scott Approximately \$500,000
2021	Prepare corridor development plan for Phase II
2022	Phase II Design and Engineering
2023-2024	Construction and Implementation
